Work rights: Student visa with work rights; eligible for an open Post Study Work Visa from Jan 2027.

PROFILE

Senior full-stack engineer with 11+ years shipping production platforms across investment, recruitment, media and e-commerce, most recently at GIC, one of the world's largest sovereign wealth funds. Deep in React/TypeScript, Python and AWS, from frontend architecture and API design through CI/CD and Kubernetes infrastructure, with a record of measurable gains in performance, reliability and release speed. Former engineering lead and startup CTO, used to owning architecture, delivery and stakeholder relationships end to end. Based in Auckland, completing a Master of Applied Finance at AUT (Jan 2027).

CAREER HIGHLIGHTS

- **Platform scale:** unified 10+ applications at GIC under one micro-frontend framework with independent team deployments; supported 300% traffic growth at GrabJobs.
- **Performance and delivery:** 30% faster APIs through caching and service design; CI/CD build time cut from 2+ hours to under 20 minutes.
- **Business impact:** 500% organic search growth after a Next.js re-architecture; Stripe subscription billing that contributed to 50% revenue growth.
- **Leadership:** led the engineering team at Findjobs across architecture, delivery and operations; co-founder and CTO of an e-commerce startup; regular mentor and code reviewer.

TECHNICAL EXPERTISE

Frontend	React, Next.js, TypeScript, JavaScript, micro-frontends, HTML/CSS
Backend	Python (FastAPI, Django), Node.js (Express), PHP/Laravel, REST, GraphQL, Stripe
Data	PostgreSQL, MySQL, Redis, MongoDB, Pandas, NumPy
Cloud & delivery	AWS, Google Cloud, Kubernetes, Docker, GitHub Actions, Jenkins, Nginx, ELK, Prometheus
Leadership	Architecture, code review, mentoring, sprint delivery, stakeholder management

PROFESSIONAL EXPERIENCE

Full-Stack Developer | GIC, Singapore — Oct 2023 – Mar 2026

- Led development of a React micro-frontend framework connecting 10+ investment and analytics applications, so product teams could build and release independently without coordinated deployments.
- Built Python services with Redis caching and role-based access control, cutting API response times by 30% on data-heavy financial dashboards while enforcing fine-grained access to sensitive investment data.
- Partnered with investment analysts, designers and project managers to turn complex requirements into intuitive internal tools, owning features from requirements through production.

Lead Software Developer | Findjobs Pte Ltd, Singapore — Jul 2020 – Sep 2023

- Led the engineering team while staying hands-on across architecture, sprint delivery, code review and production operations.
- Rebuilt CI/CD with GitHub Actions and Docker, cutting build time from 2+ hours to under 20 minutes and enabling on-demand releases.
- Re-architected the job portal with Next.js server-side rendering; organic search traffic grew 500% over the following year.
- Designed Kubernetes-based AWS infrastructure that removed recurring sources of deployment outages.

Senior Software Engineer | GrabJobs Pte Ltd, Singapore Mar 2019 – Jul 2020

- Supported 300% web traffic growth by redesigning the Next.js rendering architecture and splitting services out of the monolith.
- Built Stripe employer subscriptions, including failed-payment and billing edge cases, contributing to a 50% revenue increase.
- Overhauled logging and monitoring with ELK and Prometheus, reducing unplanned downtime by 20%.

Co-Founder / CTO (concurrent, part-time) | BitsGreat, Singapore Jun 2018 – Sep 2019

- Took an e-commerce product from concept to international customers, owning the React/Python platform, payments, AWS hosting and technical direction.

Software Engineer | Nanyang Technological University, Singapore May 2018 – Mar 2019

- Built a Python computer-vision labelling tool with partial pre-labelling, raising annotation throughput 200% across 500+ videos a week.

Senior Web Developer | EVVO Media Pte Ltd, Singapore Mar 2016 – May 2018

- Automated video recording and editing with Python and FFmpeg, up to 5x faster and removing hours of daily manual work; built a low-latency Nginx RTMP streaming solution that cut delivery latency by 50%.

Web Developer, promoted to Senior Web Developer | Novitee Pte Ltd, Yangon Dec 2014 – Jan 2016

- Built a cloud POS integrated with inventory and accounting, saving 15+ hours of manual data entry a week, and a mobile kitchen display system that replaced paper order tracking.

EDUCATION

Master of Applied Finance | Auckland University of Technology Expected Jan 2027

Master of Science in Computer Science | University of East London 2025

Bachelor of Computer Science | University of Computer Studies, Mandalay 2012
