NZ work rights: *Eligible to apply for a Post Study Work Visa after completing study in January 2027. Available for full-time work once granted; no employer sponsorship is required for the PSWV.*

Professional Summary

Senior full-stack software engineer with 11+ years of experience delivering production platforms across investment, recruitment, and media. Strong in React, TypeScript, Python, Node.js, APIs, relational databases, and cloud infrastructure. Combines hands-on engineering with technical leadership, mentoring, and direct collaboration with product and business stakeholders. Based in Auckland and targeting full-time senior engineering or hands-on technical lead roles from March 2027, subject to visa approval.

Key Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3

Backend and APIs: Python, FastAPI, Django, Node.js, Express, PHP, Laravel, REST, GraphQL, microservices

Cloud and delivery: AWS, Google Cloud, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD

Data: PostgreSQL, MySQL, MongoDB, Redis, Pandas, NumPy

Leadership: Technical direction, architecture, mentoring, code review, Agile delivery, stakeholder communication

Work Experience

Full-Stack Developer | GIC | Singapore

Oct 2023 - Mar 2026

- Led development of a React micro-frontend framework that unified 10+ investment and analytics applications while preserving independent team deployments.
- Built Python services with Redis caching and role-based access control, reducing API response times by 30% on data-heavy financial dashboards.
- Worked directly with analysts, designers, and project managers to turn complex investment requirements into intuitive internal tools.

Lead Software Developer | Findjobs Pte Ltd | Singapore

Jul 2020 - Sep 2023

- Led the engineering team and remained hands-on across architecture, sprint delivery, code review, and production operations.
- Rebuilt CI/CD with GitHub Actions and Docker, cutting build time from more than 2 hours to under 20 minutes and enabling on-demand releases.
- Re-architected the job portal in Next.js with server-side rendering; organic search traffic grew 500% over the following year.
- Designed AWS infrastructure with Kubernetes and Docker, addressing recurring causes of deployment outages.

Senior Software Engineer | GrabJobs Pte Ltd | Singapore

Mar 2019 - Jul 2020

- Helped the platform support a 300% increase in web traffic by redesigning its Next.js rendering architecture and moving services out of a growing monolith.

- Integrated Stripe employer subscriptions, including failed-payment and billing edge cases, contributing to a 50% increase in company revenue.
- Overhauled logging and monitoring with ELK and Prometheus, reducing unplanned downtime by 20%.

Co-Founder / CTO | BitsGreat | Singapore

Jun 2018 - Sep 2019

- Took an e-commerce product from concept to international customers, building the React and Python platform, payments, and AWS hosting.
- Owned technical decisions alongside the product roadmap, vendor relationships, marketing, and customer support.

Software Engineer | Nanyang Technological University | Singapore

May 2018 - Mar 2019

- Built a Python computer-vision labelling tool that increased annotation throughput by 200% and processed 500+ videos per week.
- Designed a partial pre-labelling approach that maintained annotation quality while substantially reducing manual effort for researchers.

Senior Web Developer | EVVO Media Pte Ltd | Singapore

Mar 2016 - May 2018

- Automated video recording and editing with Python and FFmpeg, making processing up to 5x faster and removing hours of daily manual work.
- Built a low-latency streaming solution with FFmpeg and Nginx RTMP that reduced delivery latency by 50%.

Web Developer / Senior Web Developer | Novitee Pte Ltd | Yangon, Myanmar

Dec 2014 - Jan 2016

- Promoted to Senior Web Developer after the first year.
- Built a mobile-optimised kitchen display system that replaced paper order tracking and saved approximately 15 minutes per shift.
- Developed a cloud POS system integrated with inventory and accounting tools, saving more than 15 hours of manual entry per week.

Education

Master of Applied Finance | Auckland University of Technology (AUT), Auckland | Expected Jan 2027

Master of Science in Computer Science | University of East London | 2025

Bachelor of Computer Science | University of Computer Studies, Mandalay, Myanmar | 2012
